

## Donning Instructions

Please consult EH&S officers or the Infection Control Center of your hospital to achieve a consensus of appropriate donning SOPs.

1. Secure your hair and remove unnecessary accessories on wrists.
  2. Perform hand hygiene.
  3. Put on the first layer of gloves.
  4. Put on your gown by placing your head through the top of the opening and insert your arms into the sleeves. Tie the gown properly.
  5. Carefully inspect the disinfected face mask (and adapter and filter if used)
  6. (**Optional if they are connected already or not used**) Serially connect the adaptor and viral filter to the snorkel face mask.
  7. Wear and adjust the PFM according to the instructions in section “Wearing and Adjusting the Face mask.” Inhale or exhale while closing off the top of the filter with your hand as a seal check according to the instructions in the same section.
  8. Perform hand hygiene.
  9. Place your gloved thumbs through the loops of the gown. Put on the second layer of gloves.

## Doffing Instructions

Please consult EH&S officers or the Infection Control Center of your hospital to achieve a consensus of appropriate doffing SOPs.

1. In the anteroom (or the doorway if there is no anteroom), grasp the gown and pull away from your body. Carefully fold the gown into ball-shape and only touch the outer surface of the gown with gloved hands. Remove the gown and the outer gloves together. Dispose the gown and the gloves into a dedicated trash can.
  2. Perform hand hygiene (you should still be wearing your inner layer of gloves).
  3. Leave the anteroom.
  4. Perform hand hygiene.
  5. Lean head forward into sniff position. Loosen the straps and remove the face mask.
  6. Gently disconnect the filter from the face mask (is used).
  7. Dispose the filter if it is intended for one-time usage, or put it into the dedicated area if the filter is designed for disinfection and reuse. Please refer to the filter manufacturer's Instructions for Use.
  8. Put the face mask into a dedicated area or dedicated box.
  9. Perform hand hygiene.
  10. Remove the inner gloves.
